Holger Mueller : Batesville, AR/ 763-688-3217/9jholger@gmail.com

UX/UI | Full Stack | Jamstack
Portfolio: https://holgermueller.github.io/portfolio/
Github: https://github.com/Holgermueller
Linkedin: https://www.linkedin.com/in/holger-mueller-75855114a/

Skills

- Developing Single-Page applications using React and Vuejs. Specifically, built a wish-list application that allows users to login and keep a list of items they'd wish to buy and prioritized those items.
- Developing SQL and NoSQL databases such as MongoDB, Firebase and MySQL.

Personal Projects

- Blog: NuxtJS front end JAMstacked with markdown files as a back end (back ends?). (NuxtJS, Markdown)
  https://holgermueller.github.io/blog/
- QR Coder: Static web app that generates downloadable qr codes, with a little ThreeJS thrown in to liven things up a little. (HTML, CSS, ThreeJS, QR Code CDN)
  https://holgermueller.github.io/qrcoder/
- Hours Tracker: Vue and Cloud Firestore come together to make a way for me to track hours I needed to make up at work due to store closures. (Vue, Cloud Firestore)
  https://trackmyhours-74a8f.web.app/
- Wish List: A single page application that gives users an alternative to a very large company's wish list feature. (Vue, Vuetify, Vuex, Cloud Firestore)
  https://less-wish-list.web.app/
- Weather App: Obligatory web-developer portfolio standby. (Vue, Vuex, OpenWeather API)
  https://holgermueller.github.io/weatherapp/
- Story Idea Generator: A single page application random word generator. (Gatsby, Material-UI) **https://confident-tesla-1e3118.netlify.app/**
